Pasta

Floating Pasta in crystal clear PMMA. Real pasta embedding in a very clear PMMA (acrylic) made with a special suspension technique in which it has been embedded. All sorts of objects now can float in the material and create this 3−dimensional magic effect. Sizes max and 650x2000x100, but from 1−2−2009 even panels to a measurement of 1000x2000x100 mm are possible. Almost all non−porous natural materials can be used. The standard collection now includes swirling multicolored metallic fabrics, textiles, pasta and printings
