Durat

DURAT® is a solid polyester based material used for custom−made surfaces in public and private interiors. It contains recycled plastics and is 100% recyclable. The material offers designers endless opportunities to create a wide variety of different surfaces. The sheets can, for example, be used to create coherent, seamless surfaces tens of metres in length with various types of edge design and intarsia patterns. DURAT® offers an extensive range of standard sink models for use in custom−made vanity units for bathrooms and public sanitary facilities. DURAT offers an extensive colour chart. The three−dimensional surface gives a special feeling of depth to black, grey and even white. The basic colours, blue, red, green and yellow, are available in many shades, and the range also includes a number of speckled alternatives. Colours can also be tinted to suit the customer's specific wishes.
