Unfinished Freshwater Mother of Pearl Tiles

The Unfinished Freshwater Mother Of Pearl range has clean symmetrical lines and a natural vibrance. The surface is unpolished, left raw as it is found in nature. The tiles consist of freshwater Mother of Pearl on a backing. Several backings are available: ceramic, acrylic, magnesium board, mesh, and aluminium honeycomb. As the shells are natural products, no two are exactly the same. Therefore the tiles also will always show a slight variation in colour and structure. The shell chip sizes range from 10x10mm to 25x25mm, with several sizes in between; the seashells are between 10x10mm and 12.5x25mm. The tiles are suitable for decoration and various uses in interior spaces, such as wall and floor tiles, table tops, basins, baths, showers, and products like vases, photo frames, boxes, et cetera. The material is resistant to normal non abrasive bathroom creams, but no harsh chemicals should be used.
