Vuelta

Vuelta is a technical two−way stretch fabric with teaselling that is pleasing to the touch. The teaselling process creates a protective cushion, that functions as a thermal insulator for the body. The fabric is composed of 85% Polyamide and 15% Elastane, and it weighs 250 g/m². The bi−stretch fabric is breathable, anti−pilling, abrasion−resistant and has a soft raised puff. It has very good UV−protecting properties. In the first place, this performance fabric is designed to support people in their (professional) sporting activities. Vuelta is also suitable for laminating.
